

We Build it Better!

COVINGTON HOMES

Our High Performance Homes offer:

- Greater Energy Savings
- More Comfortable Living
- Healthy Environment
- Higher Resale Value
- Lower Operating Costs
- Built to Current Code
(not old codes)

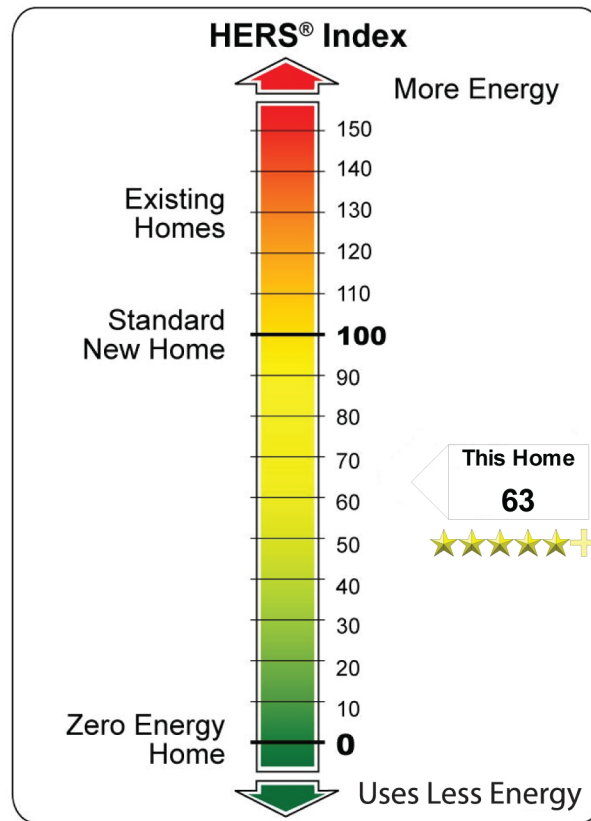

**HERS Ratings on our homes
certifies better performance**

ENERGY SMART BUILDER

Our Homes are *designed and inspected* for High Performance

Why would you buy a NEW Home built to Years OLD standards?
Would you buy a "Brand-New" 8 year old computer or iPhone? We didn't think so.
That is why our Homes are built to CURRENT codes and not OLD codes.

Our Homes have additional third party inspections performed by a HERS Rater.

HERS means Home Energy Rating Score.

We use the Energy Smart Builder Program because we believe that it is a very good program.

You should see approximately 30-40% savings on your utilities- this is important since Builders control approximately 85% of your home's utility costs.

Higher Standards, Higher Value, Higher Savings
